

Our Vision:

All children in Butts County will enter kindergarten prepared and ready to learn. All parents deserve access to parenting support. Parent educators work with families to develop personal literacy goals, provide resources, and help ensure a successful transition to kindergarten.

Butts County Family Enrichment Center

A parent is the most important teacher in a child's life.

Personal Visits:

A parent educator, specially trained in child development, will meet with your family individually to give your child a head start.

Screenings:

Developmental screenings offer parents a quick and effective way to look at how their child is learning and growing in the areas of health, vision, hearing, communication, physical development, problem solving, and social/emotional development.

Group Meetings:

You can join our group meetings with other families as you discover more about your child's development. Sessions will include playgroups, workshops, family activities, and other topics of interest.

Literacy Focus:

We will focus on letter naming and recognition, sound fluency, rhyme recognition, vocabulary (matching pictures with words), and comprehension.

Come join us!

As a parent, you are your child's first teacher and your home is your child's first classroom. Your baby begins learning at birth; brain growth and development happens more rapidly during the first few years than at any other time. The Butts County Family Enrichment Center can help you lay a strong foundation for your child's future success in school and life.

Services are provided at no cost to all interested parents living within Butts County.

Enrollment in the Butts County Family Enrichment Center is completely voluntary and free. The program is designed to serve parents and their children, ages birth to five, in the Butts County School District.

Parents do not need to have children in the school system to participate.
